Goal

## Sustainable employment

# An unprecedented method to help foreign professionals

Created in Lyon in April 2017, YOON France aims to fight the bias against foreign professionals and to promote the continuation of their careers in France, at the height of their ambitions and their skills.

We believe that the integration of foreign professionals will lead to a more responsible and productive society for all.

We address jobseekers, employees, entrepreneurs and managers to secure their career, but also companies, public actors and non-profit organisations, to support them in their actions of qualitative integration of foreign professionals.

As a non-profit law association 1901, YOON France is an actor of the Social and Solidarity Economy that works for the general interest.
